PROFILE SUMMARY

I am Paurush Sinha, and I've been coding since 6th grade (2016). Currently, I am pursuing a Bachelor of Computer Applications (BCA). I specialize in web and app development with expertise in React Native, PHP, Node.js, and MySQL. I've worked on projects like social media apps, e-commerce platforms, and custom web solutions. I am skilled in full-stack development, API integration/

EDUCATION

Bachelor of Computer Applications (BCA)
Guru Gobind Singh Indraprastha University, Delhi – *Pursuing*

12th (Senior Secondary) | Science
Prudence School, Delhi – *Percentage: 83%*

10th (Secondary)
Prudence School, Delhi – *Percentage: 81%*

SKILLS

- **Languages**
  - PHP, Python, JavaScript, SQL, Dart, C++, C
- **Frameworks/Libraries**
  - React Native
  - Flutter
  - Node.js
  - Express.js
  - React JS & Next JS
- **Web & App Development**
  - HTML
  - CSS
  - WordPress
  - React Native
  - Flutter
- **Database**
  - MySQL
  - MongoDB
- **Version Control**
  - Git
  - GitHub

- **API Development**
  - RESTful APIs
  - Postman
- **Tools**
  - Figma
  - Canva
- **Operating System**
  - Windows
  - Ubuntu

PROJECTS

S. no.	Project Name	Project Summary	Link
1	**Pranah App**	A social media application built using React Native, PHP, and MySQL, enabling seamless user interaction and secure data management.	Frontend | Backend
2	**React Native YouTube Player**	An NPM package for embedding YouTube videos in React Native apps, offering customization options for seamless integration.	NPM | Github
3	**Madhyastha UI**	A lightweight UI library for React Native, designed to simplify and enhance the development of mobile interfaces.	NPM
4	**Kraya App**	An e-commerce platform built with PHP and MySQL enables shop owners to create their online store with just a few clicks. Simplifies store management, product listing, and order processing for users.	Github
5	**Folded Pages**	A web application built with PHP and MySQL, enabling educators to share educational content and manage students, with separate dashboards for both educators and students.	Github
6	**Coaching Site**	A simple website built on WordPress, providing information about courses, and services offered by the coaching center.	
7	**sinha-rn-web**	NPM package that simplifies setting up React Native with React Native Web using React Native CLI.	NPM | Github

8	**VakyaVahan**	API-based solution that allows small businesses to send SMS using their device's SIM card. Built with Flutter, Express JS, Node JS, and MongoDB, it enables seamless integration for messaging directly through the API.	[Github (Mobile App)](#) | [Github (Backend)](#) | [Figma Design](#)
9	**FlexFind Search**	A simple search engine built using PHP and MySQL, designed to provide efficient and customizable search functionality for web applications.	[Github](#)
10	**sinha-crawl**	A web crawler built in NodeJS for FlexFind Search, designed to efficiently collect and index data for improved search functionality.	[Github](#)
11	**Niska App**	A simple expense tracker app built using Flutter, designed to help users manage and track their daily expenses efficiently.	[Github](#) | [Figma Design](#)
12	**Yugal Library**	A framework for developing single-page applications using PHP, designed specifically for static sites, enabling efficient front-end development with minimal back-end integration.	[Documentation](#) | [Github](#)
13	**Coaching Management Webapp**	A web application built with PHP to manage coaching center operations, featuring student record management, staff management, fee record management with receipt images, admission dismissal, and user rules.	[Github](#)
